Transform your practice.

European Neural Therapy Injection Techniques & Skills

A Transformative Workshop with Dietrich Klinghardt MD, PhD

Needles have been used for healing in Medicine for over 4500 years. But only 1853 Pravatz and Wood developed today's tools: the hypodermic needle and the syringe. They allow us to deliver remedies precisely to the right spot in the right amount.

Dr. Dietrich Klinghardt has observed and worked with the pioneers of injections; Cyriax, Huneke, Voll, Barber, Baum, Gabor Racz and many of their advanced students and developed a safe, comprehensive and simple set of injection techniques and skills, to be taught during this weekend.

From the content: Injection Techniques A-Z!

Needle etiquette: safety, size, storage, disposal, sterility, adverse reaction 101

Segmental injections: sinuses, tonsils, shoulder/arm, crown, spine, hips and knees, foot, ankle, hand, liver, heart and lungs

Trigger point injections: c-spine, L/S spine, shoulders. Effective medication cocktails

Detox support: off label segmental use of glutathione, homeopathics, other complexing agents, ozone

Mesotherapy with platelet rich plasma (prolotherapy, periodontal disease, eye health, hair growth, joints, pain). Simple affordable in-office procedure to make it work

The deeper injections: the major joints, Sphenopalatine ganglion, pelvic plexus

Medications and remedies for safe use: local anaesthetics, plasma, ozone, steroids, hyaluronic acid, vitamins, homeopathics

What to do when emotions and trauma-memories come up: PK

Special needle skills: bent-needle techniques. Pulsing for endorphin release. Using the bevel for curved needle procedures

The inner skills: focus, imagination, self-guided images, breathing

- **Demonstrations and treatments by a master of injections.**
- **Unique procedures and products**
- **Tips and tricks to easily incorporate into your practice.**
- **Expect Transformation. Join us this year.**
