This is a very special case.

6 year old child came with her mother in my practice in an extremely sick condition. She had been taken antibiotics for over 2 years which was of no help; quite contrarily her condition got worse by the day. Inspection showed that her mouth was full of herpes Vesicles. She had not eaten nor drunk since 3 weeks. Medical diagnosis was Salmonella enteritis' with bloody diarrhea. Bad breath. Reduced immunstatus. Strong Vaginal discharge.

Enteral Candida. No Conventional medicine helped.

Darkfield Microscopic Diagnosis: Erythrocytes with strong endobiontic infestation.

Therapy: 27.4.2005 In addition to homeopathy, we started with 3 x 1 drop of Rizol increased gradually to 3 x 5 drops daily. On the 29.4.2005, 2 days later her mouth was cleared of herpes and she started eating normally again.

Her condition has made rapid progress since then.

She now comes in occasionally for Darkfield M. Blood Control.

1) Male Pat. Age 37 M.B

Diagnosis: Postthrombotic Syndrom. Lymphostasis. Depression. Lack of concentration. Tiredness. Anaemia- Iron deficiency.

Darkfield Microscopic Diagnosis: Endobiontic burden (blood parasites)
